MEDICAID BULLETIN

Mandatory Medicaid Coverage of Routine Patient Costs Furnished in Connection with Participation in Qualifying Clinical Trials

The purpose of this bulletin is to inform providers that DMAS and all managed care organizations (MCOs) will cover routine patient costs furnished in connection with a member's participation in a qualifying clinical trial. Per guidance described in the Centers for Medicare and Medicaid Services (CMS) State Medicaid Director (SMD) letter #21-005:

- Routine patient costs that must be covered for a beneficiary participating in a qualifying clinical trial are any item or service provided to the individual under the qualifying clinical trial, including any item or service provided to prevent, diagnose, monitor, or treat complications resulting from participation in the qualifying clinical trial, to the extent that the provision of such items or services to the beneficiary would otherwise be covered outside the course of participation in the qualifying clinical trial under the state plan or waiver, including a demonstration project under section 1115 of the Act. Such routine services and costs also include any item or service required solely for the provision of the investigational item or service that is the subject of the qualifying clinical trial, including the administration of the investigational item or service.
- Routine patients costs do not include: any investigational item or service that is the
 subject of the qualifying clinical trial and is not otherwise covered outside of the
 clinical trial under the state plan, waiver, or demonstration project; and any item or
 service that is provided to the beneficiary solely to satisfy data collection and analysis
 for the qualifying clinical trial that is not used in the direct clinical management of
 the beneficiary and is not otherwise covered under the state plan, waiver, or
 demonstration project.

Providers should reference SMD #21-005 for additional, detailed information on which services are covered/not covered, definition of a qualifying clinical trial, and coverage determination requirements.

The effective date of coverage of these services is contingent upon the publication of a uniform provider attestation form – currently under development – developed for state use by the Secretary of Health and Human Services (HHS). Further guidance will be issued by DMAS after publication of the provider attestation form the HHS.
